FINCAS AZAN

Located in Ecuador, Fincas Azan SA exclusively grows Habano Criollo and Corojo wrappers for the Roberto P. Duran Premium Cigar Brands.

Overseen by Cuban expert growers, Fincas Azan, SA produces the highest quality wrappers available. These wrappers provide the oily, sweet, dark brown of the Azan Burgundy, the brown corajo of the Azan White, and the oscuro color of the Maduro Natural. The Colorado claro criollo wrapper of Roberto P. Duran Premium Cigar Brand provides the color and sweetness not experienced anywhere in many years. Many have mentioned nostalgia to when the Cuban Cohibas first came into the market more than 30 years ago.

FABRICA NICATABACO

Nicatabaco is the ultimate boutique cigar factory in Esteli, Nicaragua. The factory is overseen by a team

of Cuban experts with many years experience in leaf processing and factory operations. They are responsible for the classification of hundreds of packs of tobacco, making sure that our brands only use the best quality tobacco for the fillers, binders and wrappers.

Our cigar making philosophy is the implementation of the **Evolution and Progressive Flavor (EPF)** construction method to all of our cigars. EPF is an old Cuban tradition of cigar making in where the cigar is constructed in such a manner that the flavors gains strength and intensify from the beginning to the end of the smoking experience. Our cigars evolve from good to perfect to marvelous as you smoke them. The EPF construction method, combined with top quality tobacco, makes all of our cigars a truly enjoyable and unique experience.

EPF requires expertise, commitment to excellence, supervision and

effective quality control. It can only be achieved in a boutique factory fully committed to quality. That is why we created Nicatabaco.

All our cigar brands are 100% handmade by 20 skilled cigar rollers and buncheros. The EPF construction method requires many months of training for even the best buncheros. Each of our cigar rollers and bunchero is specialized in only one size to become the absolute master in the art of cigar making.

All Duran and Azan Cigar's distinctive Ecuador Corojo and Criollo wrappers undergo its final fermentation process in the factory. When the wrapper reaches our standard of perfection it will dress the cigars giving them their elegant and distinctive look. All the cigars will then age in our "Escaparte," the cedar climate control aging room, for a minimum of three months before arrival to your humidor.

He lived to be 99 years old and smoked on average about 8 cigars a day. I owe my livelihood to him. I wish to honor his memory with a cigar which bares his last name and honor the city of his birth, Baracoa."
